How to install supplemental language support

Before globalization (G11N) testing can begin the Windows Xp® and Windows Server operating systems must be configured to support additional languages and user locales. This job aid provides step by step instructions for installing supplemental language support which adds several Unicode font files and activates additional user locale settings available under the Standards and formats drop-down control box on the Regional Options property sheet.

Before performing this step you must be a logged on as a member of the Administrators group on the local computer.

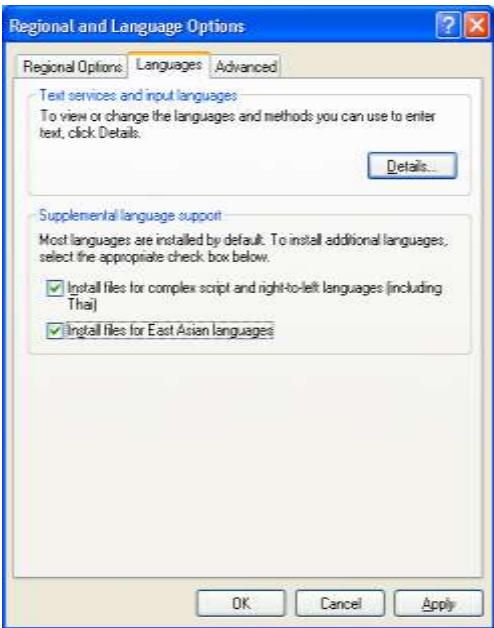

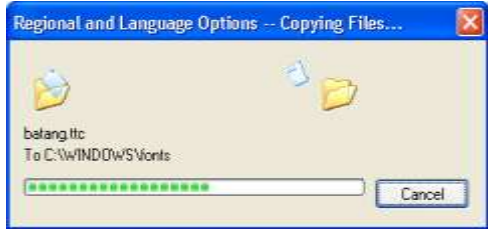

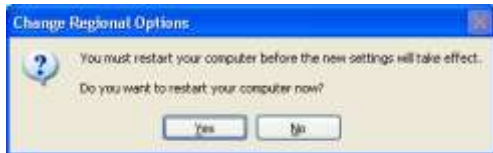

Step	Action	Example
1	<p>Launch the Regional and Language Options control panel applet in the Control Panel</p> <p>Note Alternatively type "intl.cpl" in the Start -> Run dialog.</p>	
2	<p>Select the Languages tab on the Regional and Language Options dialog.</p>
